**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-9, 20-26, and 30-33, drawn to a method of registering a shortcut name corresponding to a frequently requested destination, classified in class 704, subclass 243.
  - II. Claims 10-12 and 27-29, drawn to a method of deregistering a shortcut name corresponding to a frequently requested destination, classified in class 704, subclass 244.
  - III. Claims 13-19, drawn to a system comprising a user profile database containing a plurality of registered shortcut names for use in registering and/or deregistering shortcut names, classified in class 704, subclass 270.
2. Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as registering a shortcut name corresponding to a frequently requested destination. Subcombination II has a different utility such as deregistering a shortcut name corresponding to a frequently requested destination. And subcombination III has a different utility such as storing a plurality of registered shortcut

Art Unit: 2626

names for use in registering and/or deregistering shortcut names. See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
